JSON

Professional Experience:

Akamai Technologies

Associate Product Manager

-Responsible for Akamai's Services and Support product offerings

-Work on building and improving automated alerts for customers' websites

-Conduct meetings with a team of 16 to gather feedback from the field on product improvements

-Develop the roadmap for our premium offering along with a team of 4 product managers and architects

-Engage in good, better, best model practices when designing and enhancing products

-Oversee migration of customers from legacy products to new product portfolios

Senior Technical Support Engineer

Technical Support Engineer II

Technical Support Engineer

-Worked with 12+ Premium accounts that provide high monthly recurring revenue

-Managed multiple customer escalations for premium eCommerce and public sector customers which had high executive visibility within the customer's organization and at Akamai

-Worked with relevant stakeholders: aligned engagement managers, project managers, solutions architects, support advocates, and sales teams from Akamai as well as engineers, analysts, C-level executives, etc.

-Managed escalations for standard customers who were at risk of churn and requested an aligned resource

-Wrote and maintained quality knowledge base articles for internal and external processes

-Recipient of multiple awards: i.e. Most Impactful Team, Customer First Award, AkaLedes

-Investigated preventative measures and solutions to assist customers with common pain points

-Served as a mentor for multiple team members when they start at Akamai, including co-ops and full-time new hires

IBM Cloudant

Client Support Engineer

-Served as the voice of the customer and provided support for customers of Cloudant's Database Platform

-US East coast lead and identified ways to improve ticketing workflows in CRM

-Worked with CRM administrators to funnel in tickets to Slack chat spaces and view PagerDuty integrations

-Improved internal documentation for processes and onboarded/mentored new team members

-Worked directly with operations engineers, technical account managers, and senior developers of the core software to identify solutions for customers of the platform

Boston University College of Engineering

Student IT Consultant

-Assisted new student hires with fielding tickets from engineering faculty, staff, and students

-Wrote processes to assist peers with their day-to-day tasks

-Assisted senior and tenured faculty and staff as well as graduate students on HW/SW requirements

Projects:

Akamai: Premium 3.0 Alerts:

-Conduct meetings with a core team to improve alerts that get delivered as part of a managed delivery service

-Track JIRAs and coordinate with engineering to improve threshold recommendations for the core alerting engine

Akamai: Enhanced SLA:

-Assess current market value of an enhanced SLA offering and revising pricing strategy around the product

-Liaison with technical support team to understand pain points in delivering and meeting enhanced SLAs

Akamai: Knowledge Centered Support (KCS):

-KCS Coach: guided 4 teammates on writing quality KB articles and advance through the levels of the KCS process

-Identified duplicate articles and lead consolidation efforts for easier readability and searchability

IBM: Bluemix/Cloudant Integration:

-Held weekly meetings with other IBM teams to ensure a smooth transfer from system to system

-Made updates to the backend database to resolve failed account signups and documented processes for co-workers
